

Event Specification

Event specification form updated 27/02/21. Setup is free if you use the very latest version of the form. Check that you have the latest version from <http://www.fabian4.co.uk/create/event.aspx> where you will also find examples of how to complete the form.

Email the completed form to adrian.moir@fabian4.co.uk with a subject Event setup - <event name from section 7>.

Replace **text on a yellow background** as necessary.
Text in Green = the default value where unspecified.

Standard sections (mandatory)	
?	<p>Sections with additional help are shown with this orange ? symbol. All Standard sections need to be completed, except for sections marked as only applicable to other event types. All Advanced sections are optional.</p> <p>Please contact adrian.moir@fabian4.co.uk if you require further help.</p>

Contract T&Cs			
1	<p>I accept the current version of the Contract Terms and Conditions for Event Organisers as detailed on http://www.fabian4.co.uk/organisers_terms.aspx</p> <p>[The printed name in the Electronic Signature box represents a legal digital signature as specified by section 7 of the Electronic Communications Act 2000 and the person signing the document must be the same person (i.e. with a matching email address) as the person submitting this event specification to Fabian4].</p>	<p>Which version of the organiser T&Cs have you just read? Entry Fees and Entry Classes – HELP & EXAMPLE

**?
28
HELP**

An Entry Class is the item (class, course or other classifier) that the entrant selects at the time of entry. E.g. Blue, Green, Marathon, 10K, Fun Run, Long, Short, Navigation Training, Coaching Conference, etc). If there is only one Entry Class, the entrant doesn't have to select anything (it defaults to the one item). Each Entry Class on offer may have the same or a different Set of applicable fees. Fees may also change depending on the time of entry. For example, you may have Early Bird rates, Standard rates, and Late Entry rates. These are referred to as Fee Bands and the applicable dates are set in section 21.

As an example, a model event might have 4 orienteering type courses Blue, Green, Yellow and Orange plus a 10K race for non-orienteers. In this example the orienteering fees stay the same throughout the whole period, but the 10K fees increase before entries close.

Column 1 – for Blue and Green (Set 1, Bands 1 & 2)

Column 2 – for Orange and Yellow (Set 2, Bands 1 & 2)

Column 3 – for a 10K race (Set 3 Band 1)

Column 4 – late entry to the 10K race (Set 3 Band 2)

It might look something like the following:

	Band 1 & 2 / Event 1 / Set 1	Band 1 & 2 / Event 1 / Set 2	Band 1 / Event 1 / Set 3	Band 2 / Event 1 / Set 3
Junior Fee	5	5	15	20
Senior Fee	10	5	15	20
Family Fee (Combined fee for solo entries for each of 2 adults + any number of children)				
Team Fee (For team events only when the team fee is not the sum of solo fees)				
Junior non-member supplement (specify extra supplement amount additional to the Junior fee)	0	0	2	2
Senior non-member supplement (specify extra supplement amount additional to the Senior fee)	2	0	2	2
2 nd , 3 rd , etc Child Discount (specify reduction)				
Junior Helper Discount (specify reduction)				
Senior Helper Discount (specify reduction)				
Family Helper Discount (specify reduction)				
Junior Ecard Hire Fee	0	0		
Senior Ecard hire Fee	1	1		
Junior Touch Free Ecard Hire Fee	2	2		
Senior Touch Free Ecard Hire Fee	2	2		
Junior Own Ecard Discount (specify reduction)				
Senior Own Ecard Discount (specify reduction)				
Relay Fee (leave all the fees above empty for relay events)				

Entry Fees and Entry Classes – HELP & EXAMPLE

Advanced sections (optional)	
?	Leave the following sections blank if they are not applicable.

Covid-19 – Restricted entry & Remote EOD		
42	<p>Would you like to restrict entry to members of the national governing body only?</p> <p style="text-align: center;">Ensure section 27 is complete if the answer is yes.</p> <p style="text-align: right;">Y/N</p>	
43	<p>Optional - Would you like to restrict entry to a set of named clubs only?</p> <p>List the relevant club names in the box to the right (one club per line).</p>	
44	<p style="text-align: center;">Optional - EOD Registration Manager Email Address</p> <p>Instead of receiving a paper EOD form and cash, this function allows you to receive an email with all the key details required for your race entry/timing software instead. Ask entrants to enter online from the event car park, or before leaving home. This feature is also available from the Control Panel page.</p>	

Covid-19 – Self-select start times – HELP & EXAMPLE

?
45
HELP

This function enables the control of competitor numbers in the start area. It works on the concept of queues of starters (imagine them all lined up in physical start lanes).

There are 2 queue types:

Specific time queues – all runners start at a specific time (e.g. 11:00, 11:02, etc).

Block time queues – all runners start within a specified time range (e.g. 11:00 to 11:14, 11:15 to 11:29, etc).

Wave starts use specific time queues, where the number of competitors in each slot is greater than 1.

In our model event we are going to allocate entry classes Blue (Entry Class1) and Green (Entry Class 2) to a specific queue with 1 starter per minute (10:30 to 12:30) but with a rule to separate those on the same course by 2 minutes. Orange (Entry Class 3) and Yellow (Entry Class 4) are to be allocated to 8 x 15-minute blocks (10:30 to 12:29) with 15 runners in each block. The 10K (Entry Class 5) will use wave starts with 6 runners going off every 5 minutes from 12:35 until 13:00.

Be careful with the separation rules if your time interval between slots is not 1 (minute or second).

¹Slot separation example – if 'Units' = Minutes and 'Time interval between slots' = 2 then a 'Slot separation' = 3 would result in a 6 minute separation. I.e. Time separation = Slot separation x Time interval between slots.

Stage 1: Specify the Specific Queue types required (Note the use of defaults when applicable)

Specific Queue Type S1 This is for the Blue and Green	First start time	10:30
	Last start time	12:30
	Units in seconds or minutes (minutes)	
	Time interval between slots (1)	
	Number of available slots between vacant slots (no vacant slots)	
	¹ Slot separation of those in the same Age Class (0)	
	¹ Slot separation of those in the same Club (0)	
	¹ Slot separation of those in the same Entry Class (0)	2
	¹ Slot separation of those in the same Course (0)	
	Number in wave (1)	
Specific Queue Type S2 This is for the 10K	First start time	12:35
	Last start time	13:00
	Units in seconds or minutes (minutes)	
	Time interval between slots (1)	5
	Number of available slots between vacant slots (no vacant slots)	
	¹ Slot separation of those in the same Age Class (0)	
	¹ Slot separation of those in the same Club (0)	
	¹ Slot separation of those in the same Entry Class (0)	
	¹ Slot separation of those in the same Course (0)	
Number in wave (1)	6

Limits - HELP & EXAMPLE																	
? 50 HELP	<p>Limits can be applied to any group (Limit Group) of entry classes (or courses). For example, an overall limit would need a Limit Group consisting of all entry classes. Typically, limits are set by course. Map order limits can be advised later (i.e. after placing the map order).</p> <p>Using our model event, the following example illustrates:</p> <p>An overall event limit of 300 (due to permissions) A limit of 60 on Blue A limit of 60 on Green A limit of 200 on the 10K The Orange and Yellow are not subject to any limits, other than the overall limit of 300.</p> <p>It would look something like this.</p> <p>Stage 1: Specify the limit groups</p> <table border="1"> <thead> <tr> <th>Limit Group ID</th> <th>Applicable Entry Class IDs (or Course Numbers) as defined in section 29</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>1, 2, 3, 4, 5 (All entry classes)</td> </tr> <tr> <td>2</td> <td>1 (Blue)</td> </tr> <tr> <td>3</td> <td>2 (Green)</td> </tr> <tr> <td>4</td> <td>5 (10K)</td> </tr> <tr> <td>5</td> <td></td> </tr> <tr> <td>6</td> <td></td> </tr> <tr> <td>7</td> <td></td> </tr> </tbody> </table>	Limit Group ID	Applicable Entry Class IDs (or Course Numbers) as defined in section 29	1	1, 2, 3, 4, 5 (All entry classes)	2	1 (Blue)	3	2 (Green)	4	5 (10K)	5		6		7	
	Limit Group ID	Applicable Entry Class IDs (or Course Numbers) as defined in section 29

Limits - HELP & EXAMPLE																																				
? 50 HELP	<p>Then we specify the actual limits for each Limit Group.</p> <p>Limits that include all entry classes take precedence over other limits. So in this case once the event limit of 300 is reached, the event will automatically close, even though some of the other limits have yet to reach their maximum.</p> <p>Stage 2: Specify the limits for each Event / Limit Group pair</p> <table border="1"> <thead> <tr> <th>Event No. (1)</th> <th>Limit Group ID</th> <th>¹Limit Name (optional)</th> <th>Limit</th> <th>²Waiting List Limit (0)</th> </tr> </thead> <tbody> <tr> <td></td> <td>1</td> <td>Model Event</td> <td>300</td> <td></td> </tr> <tr> <td></td> <td>2</td> <td>Blue</td> <td>60</td> <td></td> </tr> <tr> <td></td> <td>3</td> <td>Green</td> <td>60</td> <td></td> </tr> <tr> <td></td> <td>4</td> <td>10K</td> <td>200</td> <td></td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>	Event No. (1)	Limit Group ID	¹ Limit Name (optional)	Limit	² Waiting List Limit (0)		1	Model Event	300			2	Blue	60			3	Green	60			4	10K	200

Limits		
? 50	Stage 1: Specify the limit groups	
50	Too technical? Read the HELP section (above). If section 50 still looks too technical then describe how you would like the limits setup in plain English.	
	Limit Group ID	Applicable Entry Class IDs (or Course Numbers) as defined in section 29
	1	All
	2	
	3	
	4	
	5	
	6	
	7	

Limits - continued					
? 50	<p>¹Limit Names are used in “<Limit Name> is/are full” messages to the entrant. We will create suitable names if none are specified. For example, if there was an overall limit on all senior entry classes, the limit name might be ‘Senior Classes’. Typically, overall limits use a shortened event name and course limits use the relevant course name.</p> <p>² Note that each waiting list entry is restricted to just one entrant for one event only, since cancellations often release just 1 place on one event.</p> <p>Waiting lists are not recommended when an estimate that X% won’t turn up on the day prediction will work just as well. In this case, simply increase the limit to include that extra X% (e.g. 20%).</p> <p>Full events automatically re-open by default when someone cancels, and this is often a preferred mechanism to fill available space, rather than using waiting lists, especially for orienteering events where entrants typically wish to enter in family groups rather than individually.</p> <p>The waiting list limit specifies the maximum size of the waiting list itself (not including the main limit).</p>				
	Stage 2: Specify the limits for each Event / Limit Group pair				
50 (cont.)	Event No. (1)	Limit Group ID	¹Limit Name (optional)	Limit	²Waiting List Limit (0)
		1	Winter Tanners	500	

Orienteering events only						
51	Base time of the race clock. Usually 00:00 .	Event 1	Event 2	Event 3	Event 4	Event 5
		Event 6	Event 7	Event 8	Event 9	Event 10
52	Applicable to OE2010 and OE Score V11+ users only: When taking entries by colour course, export the data, setting the class field to the entrant's standard age class (e.g. M35), and set the course to the course they selected (i.e. as though entry was taken by age class). Y/N					
53	Collect IOF IDs for entry classes: (list the relevant entry classes)					

Other Information	
54	Priority entry link (pass code protected) Y/N Use the extra link to give priority entry before the official opening date or when the event is marked as closed.
55	Accept extra one-off Adhoc payments Y/N (Only request this feature if you know you will need it)
56	Optional - If you are offering helper discounts and wish to choose your own helper discount access code, then specify it here.
57	Optional - Enter any special text to be included in the competitor's entry notification email. (Amend this via the Control Panel)
58	Military / Services event? Y/N
59	Optional - YOB is requested for orienteering and MTB events and DOB for all other events. If you wish to use a nonstandard method then specify it here: DOB / YOB / None
60	Hide the competitor's age class from the start list? Y/N
61	Optional - Enter any special text to be displayed at the top of the start list
62	Hide the special request box in step 3 – when the box is hidden, competitors will have to contact the organiser separately if they have a special request. Y/N
63	Enable the Fabian4 "Start near competitor" function. Note that this is automatically enabled when you use the Fabian4 managed start time allocation service. If you are allocating your own start times, you will be responsible for satisfying any requests. Y/N (Not applicable to events using the free self-select start time service)
